DETAILED ACTION

Reissue Applications

1. This application is objected to under 37 CFR 1.172(a) as lacking the written consent of all assignees owning an undivided interest in the patent. The consent of the assignee must be in compliance with 37 CFR 1.172. See MPEP § 1410.01.

A proper assent of the assignee in compliance with 37 CFR 1.172 and 3.73 is required in reply to this Office action. If there is no assignee the inventor must affirmatively so state.
MPEP 1410.01.

2. The original ribboned copy of the patent, or an affidavit or declaration as to loss or inaccessibility of the original patent, must be received before this reissue application can be allowed. See 37 CFR 1.178.

Reissue Oath/Declaration

3. The reissue oath/declaration filed with this application is defective (see 37 CFR 1.175 and MPEP § 1414) because of the following:

The reissue declaration does not state whether the inventor is a sole or joint inventor of the invention claimed as required by 37 CFR 1.63 (a)(4).

Art Unit: 3711

4. The reissue oath/declaration filed with this application is defective because it fails to identify at least one error which is relied upon to support the reissue application. See 37 CFR 1.175(a)(1) and MPEP § 1414.

5. The reissue oath/declaration filed with this application is defective because it fails to contain a statement that all errors which are being corrected in the reissue application up to the time of filing of the oath/declaration arose without any deceptive intention on the part of the applicant. See 37 CFR 1.175 and MPEP § 1414.

6. The Reissue Application Serial No."08/718,431" recited in paragraph 2 of the reissue declaration is inaccurate. Correction is required.

7. Claims 1-28 are rejected as being based upon a defective reissue declaration under 35 U.S.C. 251 as set forth above. See 37 CFR 1.175.

The nature of the defect(s) in the declaration is set forth in the discussion above in this Office action.

8. Claims 1-28 avoid the art for the following reasons:

The patent to Boylan et al. discloses a method for playing blackjack having wagering areas for placing bets for consecutive wins. The patent to Green and the game "Blackjack Introduced At Table Mountain" in The Fresno Bee article both disclose blackjack games wherein a player wins a large payout or bonus if the player wins a consecutive number of blackjack games. The

Art Unit: 3711

patent to Hobert discloses a craps game wherein players may place bets that a specific sequence of numbers will appear on a consecutive number of dice rolls. None of the cited references alone or in combination teach the claimed steps of “a player making a bet selecting a predetermined number of consecutive wins by placing the bet in one of a predetermined group of consecutive win bet receiving regions”, “placing the streak chip upon the chip receiving region identifying two consecutive wins to be attempted when the player has won the first game”, and “ transferring the streak chip to successively higher numbered consecutive win bet receiving regions until the streak chip is placed upon the consecutive win bet receiving area in which the consecutive win bet was originally placed”.
